SUMMARY

Senior Mobile Engineer with 6.5+ years of experience building and scaling fintech, banking, and consumer mobile applications across Android and iOS. Specialized in React Native with strong understanding of native mobile platforms, application architecture, performance optimization, memory management, app lifecycle, and secure payment systems. Experienced leading technical initiatives, mentoring developers, driving architecture improvements, and delivering high-quality mobile products used by millions of users. Proven track record in fintech, digital payments, banking, and cross-functional collaboration within Agile environments.

WORK EXPERIENCE

Senior Software Engineer - NeoSOFT Technologies

01/2024 - Present, Mumbai, India

- Led development and delivery of large - scale React Native applications across fintech and banking domains serving millions of users.
- Mentored junior and mid - level engineers through code reviews, architecture discussions, debugging sessions, and best - practice guidance.
- Drove mobile architecture improvements, React Native upgrades, dependency modernization, and codebase standardization initiatives.
- Collaborated closely with Product, Design, Backend, QA, and DevOps teams to deliver business- critical mobile features.
- Improved application stability and performance through optimization of rendering, API interactions, memory usage, and navigation flows.
- Contributed to release planning, technical estimation, sprint execution, and production incident resolution.

Software Engineer - NeoSOFT Technologies

12/2021 - 12/2023, Mumbai, India

- Worked on high - scale fintech products supporting payments, lending, onboarding, and customer engagement workflows.
- Migrated native Android functionality into shared React Native architecture, reducing maintenance overhead and accelerating feature delivery.
- Optimized application performance and reliability across Android and iOS platforms.
- Participated in architectural discussions and technical decision - making for large - scale mobile applications.

React Native Developer - W3 Kernal

10/2020 - 12/2021, Dubai, UAE

- Developed and deployed production mobile applications for UAE-based clients.
- Built scalable consumer-facing applications with REST API integrations and reusable UI components.
- Managed end-to-end app lifecycle including development, optimization, testing, and App Store / Play Store releases.
- Worked in Agile teams delivering mobile applications across e-commerce and on-demand service domains.

React Native Developer - BR Softech PVT LTD

07/2019 - 10/2020, Jaipur, India

- Contributed to the development of real-time and media-rich mobile applications.
 - Delivered full-cycle mobile app development, encompassing UI, APIs, and system optimization.
 - Enhanced debugging and performance tuning capabilities early in my career.
-

PROJECTS

Progresif - Telecom Platform

- Integrated MPGS payment gateway and maintained secure payment flows
- Worked on production deployments and release management
- Optimized application performance and improved maintainability
- Participated in planning, estimation, and cross - team delivery

The Rumor App - Social / Community Platform

- Designed modular React Native architecture improving maintainability and scalability.
- Implemented responsive layouts, bottom sheets, filters, and event management flows.
- Integrated push notifications and engagement-focused user flows.
- Managed Android and iOS production deployments.

Kissht App - Fintech / Lending

- Migrated payment and repayment flows from native Android modules to React Native.
- Developed UPI AutoPay modules supporting automated repayment journeys.
- Maintained and optimized JusPay SDK integrations to improve payment reliability.
- Worked on scalable payment journeys, edge-case handling, and production issue resolution.

RING App - Fintech / Lending

- Built scalable fintech features supporting lending and payment journeys.
- Integrated JusPay payment systems and loan partner APIs.
- Implemented analytics using Mixpanel to improve user journey visibility.
- Improved maintainability through modular React Native architecture.

IDFC Bank - Net Banking App and Website - Banking / Financial Services

- Developed and enhanced banking workflows focused on secure onboarding and user verification.
- Implemented FSM - based onboarding journeys for scalable flow management.
- Integrated SIM binding and geo - location validation features.
- Delivered production - ready mobile experiences aligned with banking - grade quality standards.

SABI - Smart Treatment Device Application

- Worked on a React Native application integrated with Bluetooth-enabled smart treatment devices.
- Implemented Bluetooth connectivity flows for device pairing, hydration checks, and treatment initiation workflows.
- Supported treatment-based device interactions including tri-light treatments and real-time device communication.
- Focused on reliability, stable device communication, and smooth user experience during treatment sessions.

FlogApp - Client-Freelancer Collaboration Platform

- Built scalable React.js and React Native applications for a client-freelancer collaboration platform.
- Implemented component-based architecture, real-time chat using Socket.io, and responsive UI systems.
- Integrated frontend applications with backend APIs and real-time services.
- Designed reusable UI components and optimized user flows for mobile and tablet devices.

EDUCATION

Master of Computer Applications - Computer Applications

Jaipur National University, 2019 - 2021, Jaipur

Bachelor of Computer Applications - Computer Applications

Maharshi Dayanand Saraswati University, 2016 - 2019, Ajmer, India

Higher Secondary Studies

SDA Senior Secondary School, 2015 - 2016, Bhilwara, India

Secondary Studies

IBVM School, 2013 - 2014, Bhilwara, India

SKILLS

React Native, JavaScript, TypeScript, Android, iOS, Kotlin(Basic), Swift(Basic), Modular Architecture, State Management(Redux, Context API), Component - Driven Development, Memory Management, App Lifecycle, Rendering Optimization, Startup Time Optimization, MPGS, JusPay, UPI AutoPay, Secure Payment Integrations, Banking Applications, Git, Firebase, App Store Deployment, Play Store Deployment, Agile Methodologies
